## Activity of the Week – Egg-Olympics!

So this year's Olympic Games have been postponed – but instead we could have our own Egg-Olympics!!

### Egg Decorating

First you need to decorate a hard-boiled egg.

Try these Wax resist eggs from <https://abcdoes.com/home-learning>

A photograph of several decorated Easter eggs in a grassy field. A blue scalloped-edge label in the top left corner reads "Wax Resist Eggs".

What you need:	What to do:
- Eggs	- Hard boil your eggs
- Wax Crayons	- once cooled, draw on their shell with wax crayons
- Food Colouring	- Mix a few drops of food colouring with water (enough to cover the egg)
- small pots	- Put the egg in food colouring and water for 10 - 20 mins
- pan	- Take out and allow to dry
- water	- Admire your egg, then eat it!

You could use paints, felt-tips, crayons or food colouring.

If you haven't got any eggs, use a small potato, or see if you can find an egg-shaped stone.

You will need an egg for everybody who lives in Your house so that you can all join in with the races!

# Rainbow Pack - Home Learning

## Egg and Spoon Race

Can you balance your egg (or your potato!) on a spoon and walk across the room?

Put one hand on your head or behind your back

- No cheating!

If that is too easy, put some obstacles in the way. Practice walking with the egg first, only run if you are feeling very confident.

## Egg – heads!

The next race is to balance an egg on your head!

If you've got a beanbag, put the beanbag on your head and put the egg on top of the beanbag. Stand very still – you don't want the egg to fall off!

If you haven't got a beanbag, could you make a bed for the egg using a sock? Now can you walk with the egg on your head?

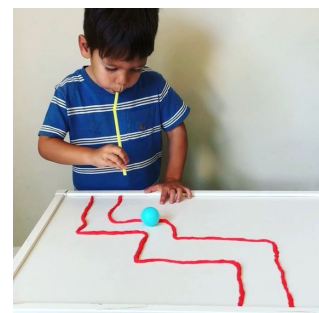

## Egg-rolling

You could have a race rolling your eggs down a hill. Whose egg goes the furthest?

Most people haven't got a hill in their garden – so you will have to make one.

There are lots of games you can play if you have got some of the coloured plastic eggs that lots of shops are selling at the moment, or you might have some light plastic balls from a ball-pool you could use instead.

You can blow the eggs with a straw, fish the eggs out of water, or pick them up with a spoon in your mouth.

# Rainbow Pack - Home Learning

## Floating and sinking

Hide different objects inside the plastic eggs and see if they will float or sink

## Nature Treasure Box

<https://abcdoes.com/home-learning/>

When you go for a walk, take an egg box with you. Can you find something interesting to put in each space in the box?

Karen Hornby

## Nature Treasure Box

Decorate an eggbox using felt tips or paints.

Go on a nature walk and use the box to collect different things you find. Talk about the colours and the changing seasons - and about only picking flowers/leaves that have fallen!

## Egg-box challenge

What else could you do with your egg box?
